

Clinic Cleaning Protocol

Clinic Set Up

- Remove all papers/magazines/coffee station in waiting rooms
- Waiting room chairs 6-feet apart and limited to 2 chairs total
- Place remaining chairs in front of front desk to minimize close contact between patients and front office

Cleaning Protocol

Between every patient:

- Wipe down all door handles, light switches, faucet handles, water bubbler, and waiting room chairs (if used) with lysol spray and towel
- All exercise equipment that was used to be wiped down with lysol spray and towel
- Plinths sprayed down with cleaning spray and towel
- Change pillow cases for all pillows used
- Wipe down all front office counters, all computer mouses, keyboards, and phones

In Clinic Protocol

- Everyone entering the clinic needs to wear facial mask covering
- Therapists will wear gloves when needed to perform manual techniques
- When able, 6-feet distancing should be maintained
- Family members should wait in the car whenever possible. For patients that are minors, a family member can wait in the clinical space with the patient

Thank you for helping us keep everyone safe and healthy!
